STATINTL

DD/A/ODP Weekly Report
Week of 3-10 June 1977

I. Major Activities During the Past Week:

A. Support to the DCI

DCITASK - Automation of two tasks for the DCI. The
customer acceptance testing of TASK II has been delayed
due to the reduced availability of GIMDEV. The 15 June
completion date (including documentation) is still
expected to be met.

They can't get into the system or are about let them in???

B. Support to DDA

AD-STUDY for Information Privacy Staff - Project
feasibility study performed by ODP. The major input
procedures for the IPS automated log data base have been
tested. The customer has entered 385 cases and the sys-
tem has been functioning satisfactorily.

STATINTL

AD-STUDY for Terminal Selection Working Group.
Terminal questionnaires were sent to members of the
Agency-wide Terminal Requirements Working Group on
3 June 1977 with responses due back to ODP by the end
of June. A working group meeting was held on 8 June
to discuss the questionnaire and answer Group members'
questions pertaining to it.

STATINTL   C. Support to OTS

TISIPS - Technical Service Interim Support Information
Processing System. A set of enhancements has been completed
for the TISIPS. These included modifications to the status
report, purging a portion of the data base, and the devel-
STATINTL   opment of a special report of stock reference numbers.

D. Support to OC

E. Support to OGCR

AGMET - Spring wheat prediction system. We completed
development of soil moisture maps for the AGMET system.

STATINTL

Also, the development of maps to display precipitation and maximum and minimum temperatures for AGZONE data has been completed. ███████████

STATINTL

F. Support to OCR

OCRDIR - Automation of the OCR directories. We have completed the data preparation for the publication of the ████████████████ for OCR. We have also begun the process of creating interface files which will be used as input to the ETEC (Electronic Text Editing and Composing) system. We expect to complete the printing publication cycle by the end of June.

STATINTL

The publication of the ████████████████ will feature our latest programming enhancements of the ETEC interface software. These enhancements include: a) automatic page make-up of the table of contents; b) automatic page make-up and numbering of the body of the directory; c) one-half point wrap-around of organization names; and d) automatic wrap-around for personality names. ███████████████

STATINTL

G. Support to OF

1. FRS - Financial Resource System. The FRS project team will conduct a seminar on "You and FRS" on 28 June 1977. Applications project teams that interface with FRS, along with representatives of GIMS Division, Production Division, and DBMB/OF will be invited. ███████████████

STATINTL

STATINTL

2. GAS - General Accounting System. We met with OF about the fiscal year end closing and completed a draft of specifications. ██████████████

H. Training During the Past Week: STATINTL

1. A four-day course, Intermediate VM, was completed by 17 students.

2. A one-day course, Interactive Systems Concepts, was completed by 21 students. ███████████████

Nothing to report on FOIA.
